1. PURPOSE

This Order is issued to mitigate an immediate risk of infestation of glassy-winged sharpshooters in Arizona by increasing protection against the entry the pest on nursery stock entering the state. This Order replaces DAO 06-03 issued on 5/1/06 to amend the area under quarantine and the restrictions.

The glassy-winged sharpshooter (GWSS) is an effective vector of *Xylella fastidiosa*, a bacterial pathogen that causes devastating diseases in a wide variety of agronomic and horticultural crops, as well as landscape ornamentals and shade trees (Hopkins & Purcell, 2002; Purcell 1979; Purcell & Hopkins, 1996; Purcell et al., 1979, and Purcell et al., 1999.)

Some of these diseases are emerging as serious, destructive diseases of important crops (e.g., almond, citrus, coffee, grapevines, peaches, and plums) in North and/or South America. In addition, a number of other non-crop plant species are hosts for *Xylella fastidiosa* (Purcell et al., 1999.) Pierce's Disease is a threat to the Arizona wine and grape industry, estimated at \$18 million in revenue. If realized, the disease would be devastating to the industry.

Although this Order becomes effective when signed by the Director, enforcement of its provisions is delayed until July 1, 2006 to allow affected states to communicate with their shippers. The Order will remain in effect until completion of the rulemaking process.

2. AUTHORITY

A. R. S. § 3-201.01 Associate director; powers and duties

A. R. S. § 3-202. Infested or infected plants as public nuisances

3. RESPONSIBILITY

The Associate Director, managers and supervisors shall ensure that all employees of the Plant Services Division understand and properly enforce this Order.

4. APPLICABILITY

This Order applies to the movement of regulated commodities from the area under quarantine.

5. ORDER

A. Area under quarantine:

1. In California, the entire counties of Los Angeles, Orange, Riverside, San Bernardino, San Diego, and Ventura, and the infested portions of the counties of Fresno, Imperial, Kern, Sacramento, Solano, Santa Barbara, Santa Clara, and Tulare.
 2. The entire states of Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, Missouri, Nevada, North Carolina, South Carolina, and Texas
 3. In Arizona, any area infested with GWSS
- B. Commodities covered.
1. All live life stages of GWSS
 2. Bulk shipments of unprocessed citrus fruit
 3. Grape, propagative parts and fruit
 4. GWSS host plants
- C. Restrictions.
1. A person may ship a regulated commodity to Arizona from an area under quarantine if each shipment is accompanied by a certificate or stamp issued by a plant regulatory official of the state of origin attesting compliance with the following:
 - a. Bulk shipments of unprocessed citrus fruit are prohibited entry into Arizona, unless certified by the origin state to be GWSS-free based on a bulk citrus trapping/treatment program.
 - b. Grape plants intended for commercial planting in Arizona:
 - (1). Grape plants and propagative parts except seed, leafless budwood, and leafless grafting wood shall have been treated with a chemical effective at killing all life stages of GWSS, and
 - (2). Grape plants and propagative parts except seed shall have:
 - (a) Been tested in a manner approved by the Director to ensure freedom from *Xylella fastidiosa*, or
 - (b) Originated from a nursery certified free of both GWSS and *Xylella fastidiosa* based on trapping and annual testing.
 - c. The GWSS host plants listed in the Appendix and their propagative parts, except leafless parts and seed, and cut flowers and cut foliage, shall have:
 - (1) Been treated with a chemical effective at killing all life stages of GWSS, or
 - (2) Originated from a nursery operating under a state or county compliance agreement to ensure that plants shipped to Arizona are free of all live life stages of GWSS.
 2. Bulk shipments of unprocessed grapes are prohibited unless approved by the Director.
 3. All live life stages of GWSS are prohibited.
